

# MelaVite BS Plus

New  
Composition!

A liquid feed supplement that can be applicable also for drenching, to cure decreased appetite, deficiency of energy and calcium appearing after calving, containing molasses, glycerol, propylene glycol, yeast, vitamins and minerals.

A great source of energy with high utilization.

As a result of its propylene glycol ingredient:

- increases propionate level of the rumen, adsorbs easily and participates in mediatory metabolism,
- increases glucose and insulin concentration of blood plasma, meanwhile ketone materials are decreasing in amount.

Lowers risk of metabolism issues  
Whole cell yeast of high biological value and enzyme activity  
Liver protecting and detoxicating effect

Decreased risk of rumen function problems

Preventing risk of mobility of the maw with liquid intake.

Complements shortage of calcium, with rapidly adsorbing calcium-gluconate to prevent calving paralysis. D3 content to ensure adsorption of calcium.

Thanks to the molasses ingredient, animals consume it willingly, because of its taste.

Nutrient values		
Moisture	35	%
Crude protein	5	%
Crude ash	7	%
Total sugar	30	%
NE I	13	MJ/kg
Calcium	min 1	%
Ca-gluconate	10	g/kg
Sodium	0,85	%
Potassium	2,85	%
Betaine	40.000	mg/kg
Niacin	2.500	mg/kg
Biotin	30	mg/kg
Vitamin D3	2.500	NE
Total amino acid	11,5	g/kg
Dried yeast culture	50	g/kg
Propylene glycol	40	g/kg
Glycerol	100	g/kg

### Application:

For dairy cows: dissolved in 15-20l water, provide to the animal right after calving. It is recommended to supply increased water need of the animal with this solution.

After calving rumen mobility problems can be prevented with this liquid intake.

For goat: after calving, 0,5l/animal/day, depending on technology.

2019.11.15.
