

MelaVite MVF 70

Liquid feed basic material for foraging ruminant animals. Includes high crude protein, betaine, amino acid and minerals content.

APPLICATION: MelaVite MVF 70 is a cost efficient solution, capable to improve taste and intake of ruminant feed. It is condensed with ammonium-sulfate resulting its high protein content that enhances bacterial environment inside the animals' stomach.

Our molasses based products contain notable amount of betaine, which is an organic amino acid can be found in sugar beet, that efficiently contributes to biochemical metabolism and helps keeping fluid balance in organisms.

RATIONING:

For cows:

- feeding twice a day - 0,5kg per feeding (1,0kg/animal/day),

- feeding multiple times a day - 0,3 – 0,4 kg per feeding (1,2 – 1,6 kg/animal/day).

Beef: 1-1,5 kg/animal/day.

Sheep and goat: 0,5 kg/animal/day.

BENEFITS:

It can efficiently replace soybean meal, or other protein sources.

Besides significant betaine content, it also includes amino acids and micro nutrients.

Its viscosity and density is lower compared to crude molasses, so adding to the mix is easier.

Enhanced rumen fermentation, more essential fatty acid – better energy supply.

Lowered urea concentration (blood, milk), less demanding for the liver – better balance of energy.
